## PROJECTS/OPEN-SOURCE

### Personal Website Portfolio Open Source Project

I developed a responsive and modern personal portfolio website to showcase my skills, projects, and achievements. The site features smooth animations, a project gallery, and a contact form, making it interactive and user-friendly.

### Hospital Management System Open Source Project

Hospital Management System: Developed a comprehensive hospital management system using C# and MS SQL to streamline patient registration, appointment scheduling, and medical records management. This project demonstrated my ability to design efficient database structures and implement user-friendly interfaces, ensuring smooth operational workflows. It highlights my skills in object-oriented programming and database integration for real-world applications.
